Summary

Highly motivated and detail-oriented Computer Science graduate with a strong foundation in **Python, Java, and SQL**, along with knowledge of software development principles and data structures. Skilled in problem-solving, object-oriented programming, and developing efficient, scalable solutions. Quick to learn new technologies and adapt to dynamic environments, with a passion for building high-quality software and collaborating within cross-functional teams. Eager to contribute technical skills, continuously enhance expertise, and grow as a software developer.

Experience

Python/AI/ML Intern

Jan 2026 – May 2026

Contriver

Bengaluru, India

Acquired hands-on experience in Python and basic AI/ML concepts during the internship, applying them to develop real-world projects. Strengthened software development and problem-solving skills through practical implementation while actively participating in weekly presentations, enhancing communication, presentation, and public speaking abilities.

Education

Acharya Institute of Technology

Computer Science in Engineering

Dec 2022 – May 2026

Presidency PU College

PCMB

8.9 CGPA

Jul 2020 – Aug 2026

93%

Projects

• Smart Healthcare System *Python · JavaScript · HTML · CSS · Flask*

Developed an AI-powered healthcare application using **Python, Flask, HTML, CSS, and JavaScript**, featuring medicine reminders, alarm scheduling, emergency contact alerts, and a rule-based chatbot for symptom analysis and basic medical guidance. Implemented core healthcare modules, integrated frontend and backend components, managed database operations, and contributed to requirement analysis, feature implementation, system integration, testing, and technical documentation to deliver a reliable and user-friendly healthcare solution.

• AI-Interview Cheating Detection System *Python · JavaScript · HTML · CSS · Flask*

Built an AI-based interview cheating detection system using **Python, Flask, OpenCV, Haar Cascade, HTML, CSS, and JavaScript** to monitor suspicious activities during online interviews. Implemented real-time face detection, eye movement tracking, multiple-person detection, and tab-switch monitoring to enhance interview integrity. Developed frontend components, integrated computer vision modules with the backend, and contributed to requirement analysis, feature implementation, system integration, testing, and technical documentation in a collaborative development environment.

Skills

- **Programming Languages:** Python, Java, JavaScript
- **Web Technologies:** HTML, CSS
- **Frameworks:** Flask
- **Databases:** MySQL
- **Core Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), DBMS, CNN
